MENTOR® CPG™ GEL BREAST IMPLANTS

10 YEARS THAT SHAPED BREAST IMPLANTS. FDA CORE STUDY¹

TEXTURE YOU CAN TRUST

PROVEN RESULTS THAT YOU CAN TRUST

By manufacturing an implant with our unique SILTEX™ Imprinted Texture, we have created a surface substantially free of pores and interstices which can contribute to a reduction in key complications during breast augmentation.^{1,2,3}

For further information about MENTOR® CPG™ Gel Breast Implants, talk to your Mentor Sales Representative or visit mentorwwllc.eu for more information.

Based on average quantities of silicone particulates removed from sample areas of tissue expanders by surface castings. Castings were analysed using scanning electron microscopy (SEM) at 50X. Testing was conducted on four tissue expanders per manufacturer. Expanders were chosen for testing as a result of the greater product availability and the comparability of the texture between anterior surfaces of both Mentor and Allergan expanders and implants. ⁸.
